SERA

BAKTOPUR - nowo opracowany preparat przeciwko infekcjom bakteryjnym u ryb słodkowodnych. O infekcji bakteryjnej świadczą białe lub szarawo-białe plamy oraz rozpulchnienie i lokalnie zaczerwienienie skóry ryb, a także zaczerwienienie okolicy odbytu i płetw. Dodatkowym objawem może być rozdęcie powłok brzusznych, odstawanie łusek, zmętnienie oczu oraz puszysty nalot w okolicy pyska i niespokojne pływanie przy dnie akwarium. Czasem może dochodzić do wystrzępienia i całkowitego uszkodzenia płetw.
